Profile

am a motivated Python backend developer with strong skills in Django and FastAPI, specializing in creating efficient and scalable web applications and Telegram bots. I have experience working with Web3 technologies and focus on writing clean and optimized code in collaborative projects. I am dedicated to continuous learning and strive to develop innovative solutions that make a positive impact.

Languages

Uzbek (local)

Projects

Nick names bot, *Nick names* 🔗
  💥 Nickname Bot — A creative approach to your personal name! 🔥

Mukammal namoz, *Mukammal namoz* 🔗
  ☪Perfect Prayer Bot is an interactive assistant designed to help you pray correctly.💥

Navoi deriksiya, *navoiy-direksiya.uz* 🔗
  This website was developed using the Django web framework, where I explored and implemented new concepts, including Django content management and other advanced features. The project allowed me to enhance my skills and apply what I learned in a real-world setting.

My personal portfolio site, *Boborahim.uz* 🔗
  This is my personal portfolio site, I made it based on Python's django framework and used sqlite database.

Istig'for bot, *Istig'for* 🔗
  This bot was developed using Web3 technology and was created as part of a team project. I've been working on the backend with FastAPI, learning new technologies along the way. Throughout the project, I focused on ensuring that server requests were processed quickly and efficiently.

Professional Experience

I worked at SIFAT IT Academy, *sifatedu.uz* 🔗   Uzbekiston, Navoi
